The PM<sup>2</sup> Alliance is an International Association of PM<sup>2</sup> practitioners and enthusiasts, an association for those who believe in open source solutions and of those who believe that PM<sup>2</sup> is ideally positioned to become Europe's methodology. The PM<sup>2</sup> Alliance provides the vision, the leadership and organisation needed to inspire, to activate and to organise the professional and volunteer community to act on the common vision and make it happen, every day, consistently and persistently, in small steps and all over Europe. It provides structure, it provides promotional material, it provides incentives and rewards to regional communities for actions and achievements, it brings regional volunteers together and facilitates cross-pollination of local strategies.
